Projects

Computer Accessories

- A responsive, fully functional computer accessories manufacturer website. Here, the users have to be logged in to get product details. The logged-in users will have the opportunity to view the other three sections (user profile, orders, review).
- The price, available quantity, and minimum quantity of individual products are mentioned respectively. If the order quantity is less than the minimum quantity or greater than the available quantity the input field will be disabled.
- **Technologies Used**: React JS, Tailwind CSS, Daisy UI, Node JS, Express JS, MongoDB, Firebase
- **Live website   Client-side   Server-Side**

Medicor

- Medicor is a fully dynamic pharmacy warehouse website. Here, the users must be logged in to manage inventories. The logged in user can delete or add a product to the warehouse.
- **Technologies Used:** React JS, React Bootstrap, Node JS, Express JS, MongoDB, Firebase.
- **medicor-warehouse   Client-side   Server-Side**

Orthopedic Physician

- Orthopedic Physician is a handy website offering a variety of independent orthopedic medical services. Here, services are described in detail and users can create their own account and avail there required services.
- Technologies Used: React JS, React Bootstrap, Firebase.
- **orthopedic physician Client-side**

Education
